

NC SCIENCE FESTIVAL

INSPIRING INNOVATION AT CMOW

The North Carolina Science Festival is a month long celebration of science every April. Each year, there are hundreds of events across the state focused on fun, interactive science learning opportunities. An initiative of Morehead Planetarium and Science Center, the Festival highlights the educational, cultural and financial impact of science in North Carolina.

The Children's Museum of Wilmington has been hosting an NC Science Festival event since 2018. Science is an important part of childhood, serving to build important skills for learning and a basis for scientific understanding. This year's event is "Inspiring Innovation at CMoW" and will provide an opportunity for little learners to test ideas, explore technology, and imagine being a scientist.
